

GFCT Research Day

24 - 30 Oct 2025

Poll results

Table of contents

- Do you agree that whilst we await the TRANSFORM findings it would be best for men and the NHS if a PSA screening programme was introduced on a phased basis starting with men most at risk then moving to all men over 50?
- To what extent do you believe the upcoming TRANSFORM trial will help speed up the introduction of a National Screening Programme? (Scale 1–5, where 1 = Not at all, and 5 = Very much so)
- Should we, as a group, sponsor an active awareness campaign for GPs — to encourage them to move away from the “come back when you have symptoms” approach and instead promote early referral to a Urologist?
- Given the NHS hasn't unlimited funds do you think it would be acceptable to charge the over 75's a modest amount for a PSA test?
- As high cholesterol is possible precursor for a stroke or heart attack, would you and your community benefit from doing a cholesterol test alongside a PSA test?
- As there are over 1 million people in the UK unknowingly walking around with diabetes, which is also a chronic health disease, would you consider doing a diabetes test alongside a PSA test?
- We offer 4 Advanced PSA tests, would you consider offering these tests to your community, who have over a score of 1.5?

Table of contents

- Do you think we should stratify follow up based of intitial PSA or underlying genetic predisposition?
- Would you like a system that can show you what difference lifestyle modifications could make?
- Which organization are you from?

Do you agree that whilst we await the TRANSFORM findings it would be best for men and the NHS if a PSA screening programme was introduced on a phased basis starting with men most at risk then moving to all men over 50?

Given the NHS hasn't unlimited funds do you think it would be acceptable to charge the over 75's a modest amount for a PSA test?

053

Yes

No

As high cholesterol is possible precursor for a stroke or heart attack, would you and your community benefit from doing a cholesterol test alongside a PSA test?

050

Yes

No

As there are over 1 million people in the UK unknowingly walking around with diabetes, which is also a chronic health disease, would you consider doing a diabetes test alongside a PSA test?

050

Yes

No

We offer 4 Advanced PSA tests, would you consider offering these tests to your community, who have over a score of 1.5?

0 4 7

Yes

No

Do you think we should stratify follow up based of intitial PSA or underlying genetic predisposition?

050

Intitial PSA

Underlying genetic predisposition

Would you like a system that can show you what difference lifestyle modifications could make?

0 4 9

Definitely — I'd be very interested

Possibly — if it's easy to use and accurate

Maybe — but I'd want to know more first

Probably not — I don't think it would be useful for me

No — I wouldn't want to use such a system

Which organization are you from?
